

## Something special is in store.

Nydree Flooring  
for Retail Settings

In retail, image is everything. So you want your flooring to reflect your store's unique look and feel – but it needs to stand up to extremely heavy foot traffic. Nydree Flooring offers virtually endless options in wood flooring that meet both your design and durability demands.

Retail Floors

### RETAIL SETTINGS

- Heavy Fixtures
- High Volume Foot Traffic

customize

Stylish Stores  
Start at the Floor

- Our products come in 11 wood species and more than 60 colors.
- Plus you can create a custom look with unique colors, sizes, species, patterns and designs (*including medallions, inserts and logos*). Our custom program allows you to create a flooring that separates your retail space from the crowd.

## Durability for the Most Demanding Retail Spaces

- Products are made from natural wood, with acrylic resin impregnated wear layer for a stronger, tougher retail store flooring.
- Engineered wear layer's multi-ply construction provides exceptional dimensional stability and distortion resistance.
- Use of marine-grade Baltic birch and Type 2 marine-grade adhesives result in a long-lasting floor.
- Allowing for superior Janka hardness (PSI), our acrylic impregnation process creates a product that's up to 300% harder to help support the weight of heavy fixtures and foot traffic.
- Hardness and durability significantly increase the longevity of the floor's lifespan, which means a major boost to your flooring budget.
- We're one of the only companies in the commercial flooring market to provide a Limited Lifetime Warranty for the wear layer and any structural defects to our product.

## Amazing Floors, Routine Maintenance

Even with heavy customer traffic, Nydree Flooring only requires routine, regular maintenance to maintain its beauty. This should include sweeping, vacuuming or dust mopping with Nydree Flooring Dust Mop Treatment. It may also be periodically cleaned with Nydree Flooring Urethane Finish Cleaner.

- Our UV-cured urethane has added anti-microbial agents to inhibit growth of bacteria, mold, mildew, etc. It also helps prevent discoloration over time.
- Aluminum oxide finish enhances the flooring's durability and scratch resistance, a key benefit for retail environments that must endure rolling racks, ever-evolving fixtures and customer foot traffic.
- Our optional oil finish, which can be replenished as needed, is UV cured to lessen visibility of scratching.

- Our flooring products are healthy for your store's customers and employees, as well as the earth. They're made of natural wood and contain no added urea-formaldehyde.
- We are members of the U.S. Green Building Council (USGBC).
- Nydree Flooring is Chain of Custody certified by the Rainforest Alliance™ to the Forest Stewardship Council™ (FSC) standards (Chain of Custody Number SW-COC-001039).
- If you choose FSC certified Nydree products, most or all of the value of the wood flooring contributes to obtaining a point under the LEED Certified Wood Credit (MRc7) for your retail space.
- For a truly green flooring, specify a Nydree Reclaimed wood product for your store.
- All Nydree Flooring products are made in the USA, with the highest quality, environmentally friendly raw materials.
