

**All Nydree Engineered Flooring Products
Installation
Colorflex Flexible Colored Caulking**

Kampel Colorflex Colored Caulking can be used to fill visible expansion spaces throughout all Nydree Flooring installations. The caulking is flexible so that the floors normal expansion and contraction can occur. It can also be used to fill gaps in the flooring that may have been caused by uneven subfloors, inaccurate cuts, and movement prior to adhesive cure. The following list shows the Colorflex standard color that closely matches the Nydree flooring color.

Colorflex 4 oz. tubes and 10.5 oz. cartridges can be ordered through American Technology @ www.americantechnologyinc.com. A 4 ounce tube will go approximately 10 feet using a 1/4" bead.

Showcase Card #1
