

Daily dust mopping with Nydree Flooring Dust Mop Treatment is recommended for all Nydree Engineered Acrylic Impregnated Flooring products with both Pedestrian Urethane Finish and Optional Oil Finish. It is a high-quality dust mop treatment formulated to clean and protect sealers and finishes. Daily dust mopping with a Nydree Dust Mop Treatment will remove dirt and grit that acts like sandpaper underfoot in wearing away finishes and sealers. Treatment with Nydree Dust Mop Treatment provides excellent resistance to black heel marks, scuffing, and scratching. Nydree Flooring Dust Mop Treatment meets all EPA-VOC requirements as a dusting aid and is classified by Underwriters' Laboratories, Inc. as to slip resistance, for greater safety.

### **DIRECTIONS - DUST MOPS AND CLOTH TREATMENT**

On new or freshly laundered dust mops - apply 2 ounces per linear foot of dust mop. Before using mops, hang overnight with wicks down. Daily care: shake out or vacuum the mop and spread wicks apart, then retreat with 1 ounce per linear foot. Again, hang treated mop in well-ventilated area until next day's use. Do not over treat mop. Heavily soiled cloths or dust mops should be laundered and retreated.

**Never treat a dust mop and immediately use it on a flooring product. It should always be hung overnight with the wicks down so the dressing can penetrate evenly throughout the wicks. Using a dust mop or cloth that hasn't sufficiently dried out on a flooring product poses a slip hazard.**

Routine maintenance products (Nydree Urethane Finish Cleaner for Pedestrian Finish and Nydree Spray Buff Cleaner for Oil Finish) should continue to be used as primary cleaners. Use Nydree Dust Mop Treatment prior to cleaning with Nydree Urethane Finish Cleaner and Nydree Spray Buff Cleaner to remove grit, dirt, sand and all foreign, loose contaminates.
